SUMMARY

AI Engineer with an ML, GenAI, and Agentic AI background, currently building production AI features at GiFTEM, an AI-powered recruiting platform, including AI-assisted search, candidate evaluation, and recruiter automation, alongside full-stack product development. Through independent projects, I have built hands-on experience with LLM applications, RAG pipelines, vector search, LangChain/LangGraph workflows, and conversational AI. Comfortable owning features end-to-end, from AI workflow design to backend services, UI implementation, optimization, and production reliability.

EDUCATION

Bachelor of AIML: Geethanjali College of Engineering and Technology - Hyderabad 2022 - 2025

Diploma in EEE: Samskruti College of Engineering and Technology - Hyderabad 2019 - 2022

SKILLS

- **LANGUAGES :-** Python, JavaScript, TypeScript, SQL, Java.
- **AI / GENERATIVE AI :-** Generative AI, Large Language Models, Prompt Engineering, LLM Applications, AI Agents, Human-in-the-Loop Concepts.
- **RAG / RETRIEVAL WORKFLOWS :-** RAG Concepts, Vectorless RAG, Data Ingestion, Document Loading, Text Chunking, Embeddings, Retrieval, Similarity Search, Vector Search.
- **VECTOR DATABASES :-** FAISS, ChromaDB, Pinecone.
- **LANGCHAIN / AGENTIC AI :-** LangChain, LangGraph, Tool Calling, Agent Workflows, Graph-Based Workflows, Nodes, Edges, State Management, Conditional Routing, Conversational Memory, Chat History Management.
- **LLM SYSTEMS :-** Deep Agents, Guardrails, LLM Gateways, Structured Outputs, Model Routing, Safety Checks.
- **AI APPLICATIONS :-** AI Chatbots, Semantic Search, Candidate Matching, Skill Gap Analysis, AI-Assisted Candidate Evaluation.
- **MACHINE LEARNING / DEEP LEARNING :-** Neural Networks, CNNs, RNNs, Deep Learning, Transfer Learning, Scikit-learn, TensorFlow, PyTorch.
- **FRONTEND :-** React.js, Next.js, TypeScript, Material UI, Tailwind CSS, Bootstrap.
- **BACKEND :-** Node.js, Express.js, REST APIs, Sequelize ORM, Socket.IO, Redis, Bull Queues.
- **DATABASES :-** PostgreSQL, MySQL, MongoDB, SQLite.
- **TOOLS & PLATFORMS :-** Git, GitHub, Postman, VS Code, Jupyter Notebook, PyCharm, Eclipse, AWS.

EXPERIENCE

AI Engineer / Full Stack AI Engineer (Full-Time) February 2025 – Present
Shuvel Digitech Private Limited

Project: GiFTEM – AI-Powered Recruiting Platform

Core contributor to GiFTEM, an AI-powered recruiting platform that helps recruiters source, analyze, shortlist, and engage candidates using semantic candidate discovery, job-to-candidate match analysis, skill-gap insights, Boolean/filter-based search, and AI voice outreach automation. ([View Project.](#))

Technologies:

Next.js, React, TypeScript, Node.js, Express.js, PostgreSQL, Sequelize, Redis, Bull Queues, AWS

Key Responsibilities:

- Built a JD-driven candidate sourcing workflow that analyzes role requirements and surfaces top-fit candidates, helping recruiters quickly move from job intake to shortlist-ready results.
- Implemented job-driven semantic candidate discovery with multiple modes including Strict, Explore, Boolean, and Filters to support both precise matching and broader candidate exploration.
- Developed AI-assisted candidate-job match insights that compare candidate profiles against job descriptions and generate recruiter-friendly evidence, fit signals, missing areas, and shortlist recommendations.
- Implemented skill-gap analysis workflows to surface matched skills, missing skills, validation points, and recruiter-friendly probe areas for candidate evaluation.
- Built AI-powered voice outreach automation including call initiation, lifecycle/status syncing, transcript capture, outcome detection, and follow-up notifications.
- Built structured AI analysis workflows that use job context and candidate profile data to generate consistent, recruiter-readable evaluation insights.
- Implemented background processing and per-job caching for long-running AI/search workflows, reducing repeated fetches and improving reliability for heavy recruiter operations.
- Optimized PostgreSQL queries and API response patterns for search-heavy endpoints, improving average response times by 25–40%.

Full Stack Developer Intern
Shuvel Digitech Private Limited

September 2024 – February 2025(6 Months)

Project: GiFTEM – AI-Powered Recruiting Platform

Contributed to early GiFTEM development by building recruiter-facing candidate search, filtering, job workflows, and backend APIs. Helped deliver AI-assisted sourcing experiences that combined recruiter queries, structured filters, and job-specific candidate discovery. ([View Project.](#))

Technologies:

React, TypeScript, Minimal UI, Node.js, Express.js, PostgreSQL, AWS, Git/GitHub

Key Responsibilities:

- Built responsive recruiter UI components using React + TypeScript, including candidate search/list views, filters, and profile workflows.
- Developed REST APIs in Node/Express to support core platform functionality (search, candidate management, job workflows).
- Implemented candidate sourcing from a professional network dataset based on job title, location, and clearance.
- Shipped an NLP-assisted search flow combining recruiter free-text queries with structured filters to improve search precision.
- Managed relational data in PostgreSQL, supported AWS deployments, and collaborated in an Agile environment using PR-based Git workflows.
